

HARMONY HOLLOW
BRASS WINDCHIMES

GUIDE TO HARMONY HOLLOW CHIME CODES

Numbers: First number = Number of tubes or rods (the "5" in "5:11").
Second number = Length of the longest tube or rod in inches (the "20" in "5:20").
Third number = The diameter of the chime tubes or rods in inches (the "1" in "5:201" - all chimes without a "1" have 3/4" diameter tubes or rods).

Suffixes: R = Rodular (solid). The absence of an "R" suffix means that the chime is tubular (hollow).
C = Quartz crystal built into windchime.
Windvane motifs are interchangeable on all Harmony Hollow Windchimes.
